Linux Professional Institute Japan (LPI-Japan)

## **About Linux Standard Textbook**

<http://www.lpi.or.jp/linuxtext/>

Linux Standard Textbook is a course material to learn Linux from the basics. This material was developed by LPI-Japan (directed by Mr. Gen Narui, [www.lpi.or.jp](http://www.lpi.or.jp)), a nonprofit organization (NPO) and a Linux engineer accreditation organization, in order to foster Linux engineers and help improve their technical capabilities. Following many requests for course material to learn Linux from the basics and for building an environment for its learning, we prepared this material for high schools, colleges, vocational schools and other educational institutions.

LPI-Japan provides Linux Standard Textbook for free to contribute to fostering Linux engineers.

Starting September 16, 2008, this material is available in downloadable form from the LPI-Japan website.

The data format is PDF.

<http://www.lpi.or.jp/linuxtext/> (246 pages in total)

There is a hard copy version available at actual cost as well.

Linux Standard Textbook is intended for students at high school, college, vocational school, and training institute, or employees at in-house training course, who are to learn Linux for the first time, as well as their teachers and instructors. The contents are designed so that the beginners can use this material as a textbook at those educational institutions. The book covers such subject as basic knowledge about Linux, its basic operations, and building a simple server environment.

Linux Standard Textbook is organized for an introductory Linux course at high school, college, and vocational school, that consists of 13 sets with the assumption that a 50-minute class multiplied by 4 times consists 1 set. The material is designed to suite a learning setting with classroom lecture accompanied by practical training.

This material has been publicly released under the terms of the Creative Commons defined herein:

■ Copyright notice

You will expressly provide that this is a copyrighted material (Copyright: LPI-Japan, a nonprofit organization (NPO)).

■ Alternation

You will never alter the contents of this PDF; you should not selectively extract any portion from this material and use it. You may use supplementary material available in the market, however.

■ Noncommercial use

This material is not for commercial use.

\*Commercial use: To use a copy of this material in a training course or a lecture conducted in a commercial enterprise; or to use this material in such activity as a paid seminar at a nonprofit organization.

Linux Standard Textbook will be updated as needed to catch up with the latest technology trend.

There are a Wiki site and a mailing list that are open to anybody to discuss text creation and update.

Wiki site URL : <http://www.lpi.or.jp/linuxtext/wiki/>

Table of Contents

Chapter 1: What is Linux?

Chapter 2: Basic Commands

Chapter 3: Regular Expression and Piping

Chapter 4: Basic Commands 2

Chapter 5: Using an Editor

Chapter 6: Manager Tasks

Chapter 7: User Privileges and Access Rights

Chapter 8: Shell Script

Chapter 9: Network Configuration and Management

Chapter 10: Network Services

Chapter 11: X Window System

Chapter 12: Hardware

Chapter 13: File Management
